Apply by Jan 28th

Earn graduate credit from Miami University's Project Dragonfly in partnership with leading institutions and communities worldwide. "Courses can be applied to the Global Field Master's Program."
Our graduate field courses have two components: an intensive experience at an international field site and semester-long work on the web culminating in an action project that engages your school, profession, or community.

**Our 2015 Classrooms**

**Amazon: Avian & Tropical Ecology**
Journey to the Amazon and learn how communities are working to save this astonishing and irreplaceable ecosystem.

**Australia: Great Barrier Reef**
Dive into the conservation and education opportunities of the Great Barrier Reef, the global center of marine biodiversity.

**Baja: Field Methods**
Experience the spectacular desert and marine landscapes of two richly diverse biosphere reserves through ecological and social field methods.

**Belize: Approaches to Environmental Stewardship**
Investigate coral reefs, manatees, howler monkeys, jaguars, and other wildlife while learning the methods communities are using to sustain them.

**Borneo: Primate Conservation**
Study Borneo's primate denizens, including the orangutan. Develop new ways to engage communities worldwide in primate conservation.

**Costa Rica: Neotropical Ecology**
Explore lowland rain forest and montane cloud forest while investigating the biotic, physical, and cultural forces that affect tropical biodiversity.

**Guyana: Local Wisdom & Conservation**
Experience one of the greatest examples of primary rain forest in the world. Learn how indigenous Makushi communities are building a sustainable future.

**Hawai'i: Saving Species**
Help save the Hawaiian crow and other native forest birds while learning what it takes to restore local plant communities and rescue species from extinction.

**India: Species, Deities & Communities**
Journey through the stunning ecological, cultural, and spiritual landscapes of the Western Ghats, where the fates of people, wildlife, and deities meet in sacred groves and forest temples.

**Kenya: Wildlife & People in Integrated Landscapes**
Join conservationists, educators, community leaders, and youth to study sustainable approaches to human/wildlife coexistence.

**Mongolia: Steppe Ecology & Civic Media**
Explore an incomparable grassland ecosystem. Learn how to support citizen conservation reporters. Focus on the Pallas' cat and Przewalski's horse, one of the most successful species reintroductions of our time.

**Namibia: Great Cat Conservation**
Experience ongoing research projects such as radio tracking, cheetah physiology, ecosystem management, and the design of school and community programs.

**Thailand: Buddhism & Conservation**
Study emerging models in conservation and education. Understand nature through Buddhist philosophy.

---

**Earth Expeditions Details**

**Why Participate?**
- Have an incomparable global field experience
- Learn about conservation programs directly from the communities and researchers who run them
- Meet and collaborate with individuals throughout the world who are affecting groundbreaking change
- Re-energize your professional life through inquiry and participatory leadership
- Create an action project with the support of your web-based class, and make a difference in your community

**Who is Eligible?**
Individuals from all disciplines and settings, including pre-K-12 teachers and university educators, school administrators, naturalists, and other professionals from zoos, environmental centers, businesses, parks, and museums. All are invited to apply.

**Applying Online is Easy!**
- Apply at www.EarthExpeditions.org by Jan. 28

**Global Field Program (GFP) Master’s Degree**

*You can build on Earth Expeditions to earn a master’s.*

Earth Expeditions courses are the foundation of a transformative master's degree program that combines summer field experiences worldwide with collaborative projects via web learning communities. GFP candidates join a growing network of global leaders who work collaboratively to affect change in local and global contexts.

**Eligibility**
Bachelor's degree required. Enrollment is open to applicants regardless of academic major or profession. Because the GFP is field- and web-based, the degree can be completed part-time while working from anywhere in the U.S. or overseas.

**Degrees from Miami University**
Master of Arts (MA) in Biology
Master of Arts in Teaching (MAT) in the Biological Sciences

**Costs**
Miami University deeply discounts tuition for all Earth Expeditions and web-based courses in this global master's program.

In addition to applying to Earth Expeditions by Jan. 28, GFP applicants also apply to Miami University’s Graduate School by Jan. 18.
